New JELD-WEN® Builders Clad-Wood sliding patio doors offer exceptional features at a great value. They are built with AuraLast, The Worry-Free Wood®, feature extruded aluminum cladding and are supported with an industry leading 20-year Limited Warranty.

RELIABILITY *for real life*®

Only JELD-WEN makes windows, patio doors, exterior doors and door frames with worry-free solid pine AuraLast® wood, which offers superior protection from wood decay, water saturation, and termites. It also acts as a grain sealant, allowing for a beautiful, even and enduring stain finish.

Dual point lock for added security and increased performance. Available in White, Black, Polished Brass and Brushed Chrome (also available with keyed and keyed alike cylinders).

Blinds between the glass (BBG) provide privacy and are virtually maintenance-free. The blinds, which have no exposed cords, are thermally sealed between clear insulating glass. So there's no need for dusting. They're also easy to raise, lower and tilt with a reduced travel operator that moves the blinds two inches for every one inch you move. Additional benefits include less exposure to allergens, reduced fading of interior furnishings and increased energy efficiency.

LOW-MAINTENANCE CLAD EXTERIORS IN SIX COLORS:

Standard Features

- Solid pine AuraLast® wood protects against wood decay, water saturation and termites
- Exterior frame and panel surfaces completely covered with low-maintenance, extruded aluminum cladding with integral nailing fin
- 4-9/16" jamba
- Natural wood interior
- Fiberglass sill provides an exceptional thermal barrier and integrates a concealed sill anchoring system to reduce crowning
- The fiberglass sill with corner key construction provides a tight seal from water and raises wood components above the water line to prevent water absorption
- Ball check weep system seals during heavy winds to prevent water from entering
- Extremely smooth operating stainless steel rollers are end adjustable for a clean appearance
- Comes assembled from the factory to save you time and money and to ensure reliable performance
- Panels are thermally broken by a fiberglass interlock to prevent direct exterior to interior temperature transfer
- Tempered Low-E insulating glass with argon gas fill for greater energy efficiency
- DP 35 rating standard

Optional Features

- Glass options include Blinds Between the Glass, Clear, LoE³-366, Obscure, Dual Low-E
- Clear natural interior
- Factory stained interior - fruitwood, cider or cordovan
- Factory pre-finished interior - extra white or factory primed
- DP 50 rating
- Variety of sidelights and transoms that may be factory mulled
- Choose from exterior sliding or heavy duty top rolling insect screens*
- Jamb depths in 1/16" increments up to 7-9/16"
- Available as an ENERGY STAR® and Energy Tax Credit qualifying door

* Insect screens are intended to allow air and light in, while keeping insects out. They are not intended to stop children from falling through an open window or door. For safety screens and other security devices, contact your local building supply retailer.
