

In a continued effort to increase stability and speed of QuickQuote, we will be upgrading the software. To ensure you receive the full benefit of this improvement, please ensure that your system meets the minimum requirements. These are slightly different than previous system requirements. To determine what your current system specifications are, see below for a step-by-step guide.

The minimum requirements are:

Operating System

- Windows XP: Service Pack 3
- Windows Vista
- Windows 7
- Windows 8

Hardware

Minimum processor speed	Intel® Pentium® 4 or AMD Athlon® 64 processor (2GHz or faster)
Available RAM	2GB, 4GB or more (recommended)
Available hard disk space	3GB of available hard-disk space for installation
Display resolution	1024x768 display (1280x800 recommended)
Network	Internet connection with web access required for electronically transmitting orders
Software	<ul style="list-style-type: none"> • Microsoft Office required for transferring orders via email or submitting support issues via email from within QuickQuote • PDF viewer for previewing print outs and reports

.NET Framework Requirements

- Machine must have minimum .NET framework 4.0 installed

To determine which .NET Framework is installed:

1. Go to the Control Panel (usually found under the Start menu or Start → Settings)
2. Within the Control Panel, open up “Add or Remove Programs”
3. Look to make sure **Microsoft .NET Framework 4.0** is installed
 - a. Remember, numbers higher than this will also work (i.e. 4.0 Service Pack 1)

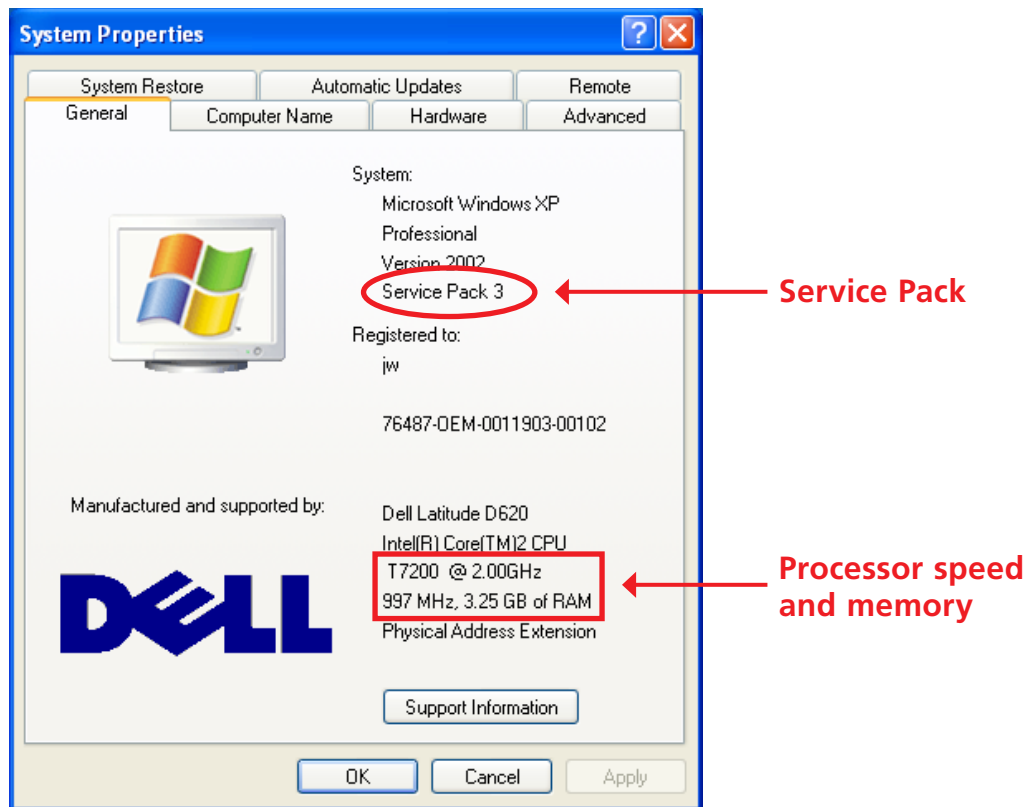

* Note that if the computer is connected to and has access to the internet, QuickQuote will try and install the necessary .NET Framework and any other critical components during the installation process.

Please note that similar to other software providers, including Microsoft, we will no longer support Windows 2000 or Windows XP SP2. Microsoft officially ended support for these products in July of 2010.

Viewing your system specifications (Windows XP and Windows 7)

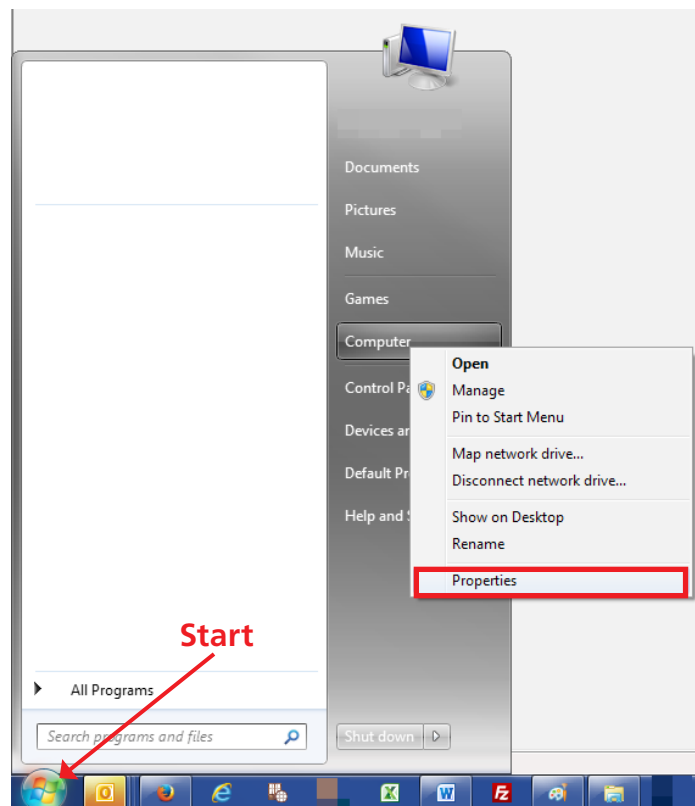

Windows XP

Right click on "My Computer" and then click on Properties

Windows 7

Click on the start bubble and look for "Computer." Right click on this and select Properties

The operating system as well as the system specifications can be found here

The screenshot shows the Windows 7 Control Panel window for System and Security > System. The main content area is titled "View basic information about your computer". It is divided into several sections:

- Windows edition:** Windows 7 Ultimate, Copyright © 2009 Microsoft Corporation. All rights reserved., Service Pack 1. This section is highlighted with a red box and labeled "Operating System Info".
- System:** Manufacturer: Dell; Model: Latitude E6420; Rating: 5.7 (with a note "Your Windows Experience Index needs to be refreshed"); Processor: Intel(R) Core(TM) i7-2640M CPU @ 2.80GHz 2.80 GHz; Installed memory (RAM): 6.00 GB (5.88 GB usable); System type: 64-bit Operating System; Pen and Touch: No Pen or Touch Input is available for this Display. This section is highlighted with a red box and labeled "Hardware Information".
- Dell support:** Website: Online support.
- Computer name, domain, and workgroup settings:** Computer name, Full computer name, Computer description, Domain. A "Change settings" link is present.
- Windows activation:** Windows is activated; Product ID.

On the left side, there is a "Control Panel Home" sidebar with links to Device Manager, Remote settings, System protection, and Advanced system settings. At the bottom left, there is a "See also" section with links to Action Center, Windows Update, and Performance Information and Tools. At the bottom right, there is a "genuine Microsoft software" logo with the text "Learn more online..."
